

Regional Training- A Closer Look at the Grants Management System and the Prevention Data Portal

Michelle Nienhius and Kallie Snipes, DAODAS 2024 February and March Regional Trainings

- Training Objectives:
 - 1. Discuss briefly the prevention data portal forms and provide tips related to completing the 6 strategy-type forms in the prevention data portal (10-10:30 am)
 - 2. Demonstrate creating and pulling reports from the Grant Management System (GMS) linked to the Prevention Data Portal (10:30-11:30 am)
 - 3. Demonstrate the linkage between monthly data reports that can be pulled from GMS and the financial reimbursement requests entered into GMS for approval by DAODAS (11:30 am- 12:00 pm)
 - 4. Discuss briefly other customized reports that can be built for program monitoring/evaluation of outcomes and reporting on mid-year/year-end reporting metrics in GMS (12:00 pm-12:30 pm)

Data Collection Portal •Portal URL: <u>https://das-</u> prod.powerappsportals.us

Navigation

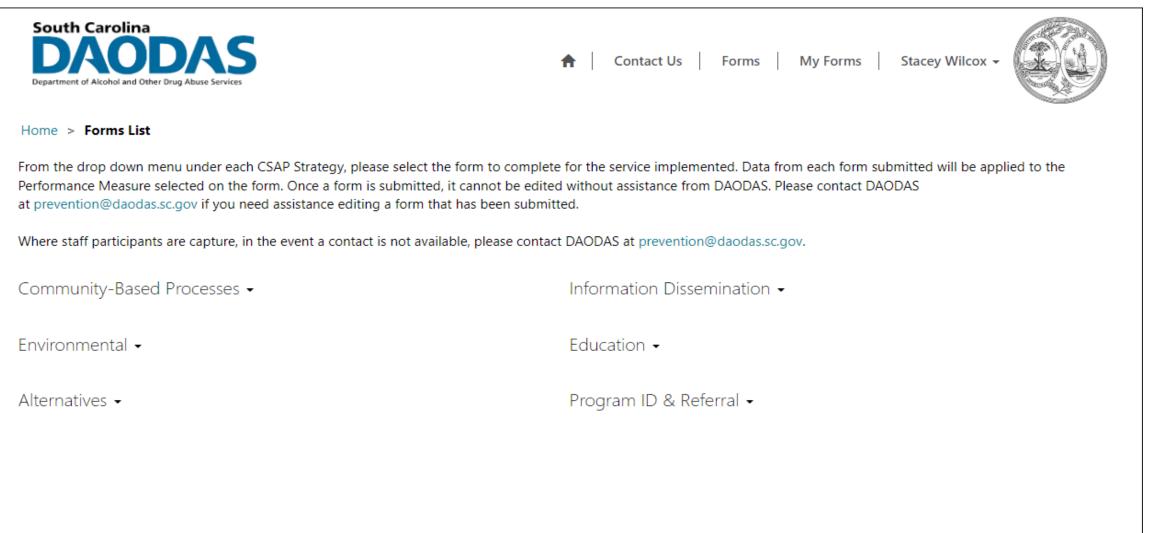

• The DAODAS Portal is comprised of a Home Page, Forms library, and a My Forms view. Users must complete the portal registration process and be signed in to access each page. The sections below offer an overview and/or functionality of each page.

• Home Page

 The Home Page offers information about the portal, including instructions and important dates

• Forms

- The Forms library includes forms grouped by strategy. By default, strategies are collapsed. Clicking the drop down next to a strategy displays the related forms.
- Clicking on a form launches the form detail. Each form contains a series of fields for reporting on an event or activity. The top section in each form contains fields that display a list of options that are filtered based on the authenticated user's set-up in Dynamics 365 (D365), which is managed by the DAODAS Prevention team.
- The Organization field displays only those organizations to which the authenticated user is assigned in D365.

- All data collected is utilized by DAODAS for the SABG report that is due in December each year (reporting dates are generally two calendar years back). Prevention forms and finance tables. (Show reports from WEBBGAS)
- Data is utilized and further analysis is provided by PIRE for the SC Prevention Outcomes Report. Highlights of the report are provided to the field at the May Prevention Quarterly Meeting for the previous fiscal year. (Reports published on SC Documents website: <u>https://ncweb.pire.org/</u>
- Encourage local providers to utilize data in local planning efforts each year with the County plan and BG applications.

• Form Submission Statuses

- The Save button at the bottom of the form has three (3) functions. You must click save to open up the other areas of the form that must be completed such as time and demographics.
 - 1. Clicking Save the first time enables sub-forms to display, such as Staff Members and Volunteers (for all forms) and a Demographics sub-form (for Educational forms).

Administration Form Name	
Speaking Engagements	
Save	

• Staff Members and Volunteers

- Each form contains a section for indicating the Staff Members and Volunteers that contributed to the event or activity. This section is comprised of a subform, which is enabled upon clicking the Save button at the bottom of the form.
- Clicking the Create button for Staff Members displays the sub-form. Only one member can be added at a time. Select the member, and then click Select.
- Enter the Direct and Indirect time and click Save. The Total Hours and Total Minutes are automatically calculated.
- NOTE: If Hours are entered for Direct or for Indirect, then the related Minutes field must be completed, and vice versa. Entering '0' is an acceptable value.
- Clicking Save records the staff member on the form.
- Click Create again to add the next staff member, if applicable.

- The Volunteers sub-form works similar to the Staff Members sub-form. Clicking the Create button opens the sub-form. Use the Volunteer Type field to indicate the type of volunteer that contributed to the event or activity.
- The Volunteer ID is used to indicate the unique identifier used by the volunteer. While optional for submission, it is recommended that the identifier be entered when Volunteer Type = Volunteer ID.
- Use the Direct and/or Indirect time entry fields to record the volunteer's time.
- Clicking Save records the volunteer on the form. Click Create again to add the next volunteer, if applicable.

NOTE: Attempting to save a submission without adding at least one Staff Member or one Volunteer renders an error message.

When the form is in draft status, it can be reviewed at the local level for any errors. A form can stay in draft until the service is rendered-therefore indirect time can be entered "real time" before a service is completed. DAODAS will have the ability to see all forms-those in draft and submitted.

Clicking Save a second time without checking the 'confirm' checkbox saves the form in a Draft status. The form can be opened from the My Forms page to make changes.

	Administration Form Name Speaking Engagements
C	I confirm the information submitted is complete.
	Save

When form has been reviewed at the local level and is ready for submission to DAODAS, click confirm. This is final step in process. Once a form has been **submitted**, the data will populate the corresponding performance measure will in GrantVantage.

Clicking Save with the confirm statement checked sets the form to a Submitted status. A form <u>cannot</u> be altered after it has been submitted. To make modifications to a submitted form, contact the DAODAS Prevention team.

Administration Form Name Speaking Engagements
I confirm the information submitted is complete.
Save

- The Educational forms also contain a Demographics section as a subform. This form is enabled the first time the Educational form is saved.
- Clicking Create opens the sub-form for recording the demographics specific to a Group/Session Date. The Headcount serves as the point of validation for demographic counts per session. If the counts for each demographic do not equal the Headcount, an error message is displayed.
- Clicking Save on the demographic sub-form records the session details on the primary form. Click Create to add another session.
- Total Number Served field on the Educational form is used to indicate the number of participants in the session with the highest headcount.

My Forms

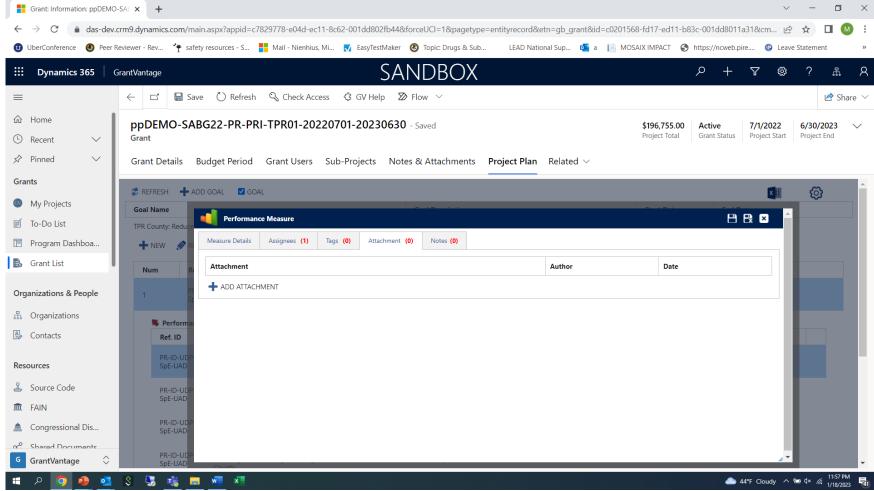

- The My Forms page displays a list of forms initiated or submitted by the authenticated user. By default, the form submissions are sorted by Submitted Date in descending order. Clicking on a column name changes the list sort order in ascending order based on the values in *that* column. Clicking the column name again sorts the list in descending order.
- The Submitted Date is the primary attribute (hyperlink) for each submission. Clicking on the date/time opens the form in its last saved state.
- Forms with a Submitted Status of Draft will open in Edit mode and can be updated prior to submission.
- Forms with a Submitted Status of Submitted will open in Read Only mode.
- NOTE: To delete a submitted form, contact the DAODAS Prevention team and GMS Support. Submitted forms cannot be edited. DAODAS will have to delete the form and the information must be re-entered in order to capture the data accurately. Please check that all fields are complete, all staff/volunteer time is entered and that the goal, objective/performance measure align with the type of strategy/form selected prior to submitting the form.

Data Entry Tips:

- Planning time (indirect time) for all staff should be entered for the service under the applicable performance
 measure using the prevention data portal forms. The form should be saved as a draft and planning time added
 each month with a note in the description box indicating the month and the total number of planning hours
 entered for that month.
- Example: Health Fair is set for a future date three months out (event in April 2024). If planning begins today, form should be opened with event date recorded as April 15th. All indirect time (planning time for staff and volunteers) should be entered as it occurs in a service form for the Health Fair. At that time, the form should move from draft status to submitted. Indirect time for February, March and April should be entered into the form each month with a note included in the description box- for example. Planning time for health fair 6 hours February; planning time 4 hours March and planning time 5 hours April. The form should be updated and saved as a draft until the event occurs and all final data is entered. Once event occurs on April 15, the remaining data can be entered (direct hours, demographics, counts, etc.) and the form can be saved and submitted once complete.
- If planning time is accrued for a service/activity that **does not have** a current goal/objective or performance measure under the project being funded, that is the only time it should be recorded and submitted on the administrative time monthly Excel spreadsheet and uploaded into GMS under the Admin Time/Planning time goal. Primarily the Excel spreadsheet is **only used to record administrative time** accrued monthly.

Single click on the "attachment" tab to bring up the screen to add the "Monthly Administrative Time" Excel spreadsheet file that is saved on your computer

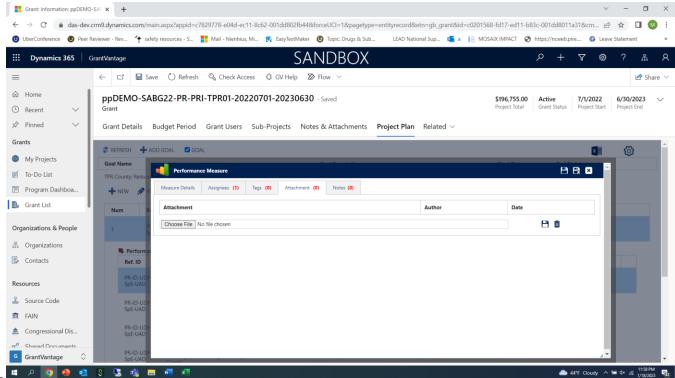

5/1/2019

Steps to attach a file to PM:

Single click on "+ADD ATTACHMENT"

South Carolina

- Single click on "Choose File"-this will bring up a menu from your computer-find the file that you want to upload that is saved on your computer desktop or files
 - Make sure to label the Excel spreadsheet by the month. For example, "Administrative Time Jan 23"
- Click on the file you want to attach and then click open-you should now see that file populate beside the "choose file" in the box-then click on the "disk" icon to save file.
- To save the entire record, click on the "disk" at the top in the blue area to save. The "disk" with the "x" will save and close the file.
- If you need to make a change to the file at anytime, you can go in and click the trashcan icon to delete the file and re-attach a new file.
- Add a new file each month-you should be able to see multiple files over time.

Data Entry Tips:

Several services target multiple objectives. If we are targeting two different objectives, do we have to make two entries for that service?

• The service information should go under the appropriate objective. For example, if you conduct a health fair for 3 substances, you can choose to place the information in the data portal in 3 different objectives (dividing the total number served by 3 and entering a third of the information into each objective) or you can enter one health fair in the alcohol objective this service implementation and for the next one, enter it into a different objective.

For example: If there were 300 people in attendance at the health fair, you could place 100 under the underage alcohol health fair objective, 100 under the tobacco health fair goal and 100 under the prescription drug objective **OR** you can enter all three hundred people under the alcohol health fair objective for this service event and then enter the next health fair that you conduct under tobacco, etc. **Ultimately the numbers will all be counted as** *individuals you served during the year, so we do not want to double or triple report data.* DAODAS will explore the ability to select multiple objective in the future.

- Data Entry Tips:
 - Please complete **all fields** with accurate information. For events with larger numbers-please estimate the demographics-do not use "unknown" as default.
 - Open a form as soon as you begin preparing for/working on the planning for the event. A form can remain in draft as long as needed to complete the activity.
 - Add notes in the description to highlight indirect time for each month. This can be a summary of all time for all staff working on the event. For example, you are planning for an alternative event that will be held in April and you begin working on the planning for the event in January. The form can be opened in January and indirect time for all staff/volunteers captured each month leading up the event if it is saved as a draft. Once the event occurs in April and all final information is entered (direct'/indirect time, demographics for people served, etc.) then the form should be submitted.
 - Only one form should be completed and submitted for each service/event. If there are multiple staff members and/or volunteers working on an event, please do not submit more than one form. All time should correspond to one form for the event.

Data Reporting: A Closer Look at pulling data from Prevention Data Portal for Monthly Reimbursement Reporting

DAODAS Prevention Team

November 2, 2023

Data Reporting Standards From Prevention Standards Manual:

- Minimum standards for accuracy of monthly data entered into the webbased reporting system are as follows:
- *a*) correct application of service categories (direct vs. indirect) and populations served;
- b) required monthly documentation of service hours for any organizational member or volunteer who is providing prevention services;
- c) Demographics of people served in prevention services as required for federal reporting;
- *d*) appropriate documentation of funding and reporting to ensure compliance.
- **These are just a few highlights from the Manual, please read the entire document and contact DAODAS with any questions.

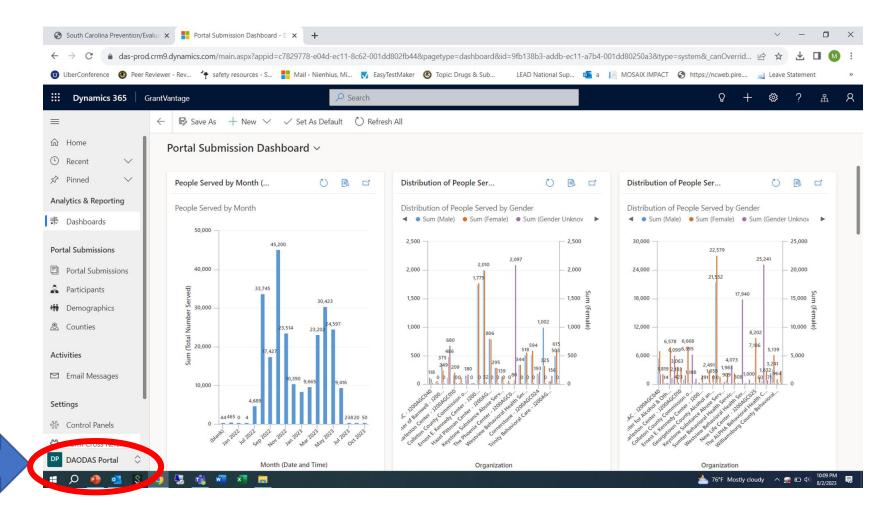

- New projects for this fiscal year in GMS: SABG23-PR-ALL-XXX-20230701-20240630
- Please complete all fields (even the ones that are not labeled as required) to ensure that the integrity of the data is high.
- If you have a question related to data forms, please contact prevention@daodas.sc.gov to ensure accurate information is reported.
- If you have questions related to accessing the prevention data portal, please contact <u>gms-support@daodas.sc.gov</u> and cc <u>prevention@daodas.sc.gov</u>

- Reports can be built from GMS and customized to retrieve any data that is entered into the portal.
- Reports can be downloaded into Excel and shared with staff who do not have access to GMS.
- Reports should be used monthly to ensure data accuracy.
- Report views can be saved once built so that you can access them over and over again without having to constantly build new reports.
- Filtering is important as it relates to pulling the data for your countythis can be done in GMS and when the data is pulled out into Excel-"filtering is my friend".

Steps for pulling data from Prevention Data Portal through GMS:

South Carolina

1. Bottom left-hand corner- Click on blue "G-GrantVantage" symbol and change view to "DAODAS Portal (DP)" view

2. On left-hand side, click on "Portal Submission"

4. Click "+ Add Columns" to add the following columns to the report:

• Form Name

South Carolina

- Intervention Type
- Total Duration Hours
- Total Duration Minutes
- Strategy

You can add the columns by typing the heading in the <u>search bar (Form Name)</u> and then select the heading and click "<u>CLOSE</u>".

This will then take you back to the list.

Repeat the steps to continue to add each one until you have all of the additional columns added to the list then hit <u>"APPLY"</u> to save.

🗯 🔎 💁 💁 💲 🧿 🖫 🖏 🐖 🛤

- Planning time for the month should be entered in a form <u>related to the strategy</u> <u>even if the strategy service date will be in another month.</u>
- For example, if a speaking engagement will be conducted on December 1 and the staff begins planning for the event in November, <u>go ahead and open the form and</u> <u>enter planning time in the form as you are planning</u>.
- A note should be placed in the "description" section of the form with a brief explanation of the planning time attributed to the service.
- Objective should line up with strategy. For example, you would not have a problem identification and referral objective with an information dissemination strategy and speaking engagement form.

🮐 36°F Clear へ 🖭 🖓 🗍 11/1/2023 🗮

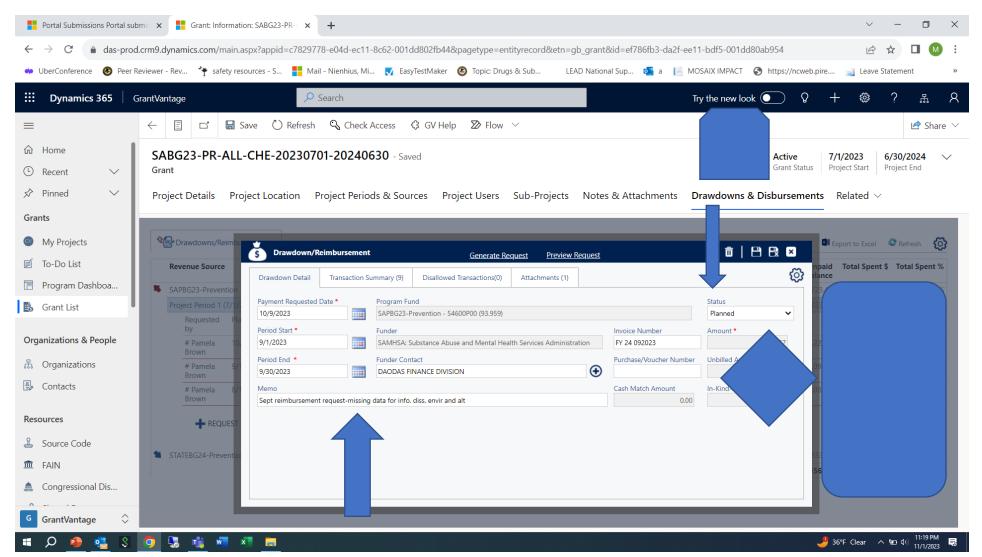

• The data submitted aligns with the request- DAODAS program staff changes the status from "requested" to " approved" and notes "services on target". At that point, DAODAS finance team will process the reimbursement request for payment. The status will stay in "approved" until the payment is made to the agency. At that time the status will

change to "paid in full".

South Carolina

If data for any service area is missing, the "request" will be returned to "planned" status and a note will be placed in the memo related to the areas that data is missing.

You can also download the data to an excel file.

Click "Export to Excel" at the top right of the Portal Submissions page.

The file will download into your "downloads" folder.

Once the data is in Excel, you can work with the data and filter the information in many different ways. The Excel report can be shared with agency leadership as needed, finance to demonstrate services provided (or forms that are in draft) for monthly reimbursement requests, etc.

You can also just apply various filters and remove them as needed if you are only needing a <u>"quick" view of information</u>.

2

Contact DAODAS with any questions or technical assistance requests. We can walk you through this step-by-step as needed via TEAMS/ZOOM. (prevention@daodas.sc.gov)

You can also save the view that was built for this report in order to come back to it month to month. That way you can skip steps 3-5 related to building the custom review. <u>Click on drop down arrow beside "All Portal</u> <u>Submissions" title and then click on "save as a new view"</u>

You can build any reports with any combination of data you want and then save/name the reports for future recall.

- Choose report you want to view
- When template comes up, complete the fields as suggested below:
- Year: 2022

South Carolina

- **Reporting Period**: SC State fiscal year July 1-June 30
- Strategy: Select All (you can also narrow down by only one strategy at a time)
- Intervention Type: Select All (or if you are choosing one strategy, be sure to select the right intervention type for the strategy selected)
- Counties: Can choose one or multiple counties to view
- Forms: Select All
- Organizations: Select organization that matches the county or counties of service selected
- Click "View Report"
- <u>Click on "save" icon</u> to download report to PDF that can be provided to leadership or other partners
- Contact DAODAS with any questions or technical assistance requests. We can walk you through this step-by-step as needed via TEAMS/ZOOM. (prevention@daodas.sc.gov)

Completing Year- End Report Deliverable in GMS

- "Actuals" for each performance measure will be manually entered into GMS
- "Results" for each performance measure will pull over from the prevention data portal for all submitted forms. If there is a number that is not correct or blank, please check the status of the forms in the prevention data portal to ensure all forms have been submitted
- Pulling a data report (like the monthly reimburse check report) can allow you to easily sort by objective and enter the "actual" number of events into the performance measure-follow the steps previously outlined to download Excel file from DAODAS Data Portal tab in GMS

Tips for FY25 SABG Prevention Application

Each application will contain copies of relevant GOP spreadsheets– Just as last year, they will be locked except for the "Goal" field, the "Manager" fields and the "Planned" fields for each performance measure.

In order to fill out the sheets correctly, please enter the name of the county you are filling this out for in the "Goal" field, replacing the text, "[County Name]". There must be a different sheet for each county you are implementing services.

Please fill in the "Manager" field with the name of the person responsible for entering the data in GMS. This is someone with a GMS license, for the production side. For PREVENTION, there may be individuals who enter data on the portal that do not have a GMS license, the "Manager" field is for the individual responsible for entering the information in the GMS project. **PLEASE be sure to enter the name exactly as it appears in GMS.** We ask that you look at the current year's project to ensure proper form for names. If your name is Pete Mitchell, and in GMS you are listed as Peter Mitchell, you must enter it as Peter Mitchell.

Tips for FY25 SABG Prevention Application

Please enter the projected SFY25 outcome metric for each measure in the "Planned" field. Enter a "0" if you do not plan to implement the strategy. Entering a "0" will let DAODAS know we need to delete that objective and performance measure when we set-up the project in GMS. We suggest you look to you SFY24 project as guide for estimating planned amounts. You can estimate your year end data by looking at your mid-year data and making the appropriate calculations.

Complete **all Excel spreadsheets** related back to the programs and strategies your agency plans to fund utilizing the SAPT BG primary prevention funds. For example, if you plan to implement 2 Take Back Days with your SAPT BG funds and 2 Take Back Days with the Opioid Settlement funds the agency receives, collecting a total of 200 pounds of medicine in the four events, the sheet for opioids should be completed with the performance measure for the SAPT BG set for 2 Take Back Days and 100 pounds of medicine collected (for example).

If a goal/objective/performance measure is not included in your agency's project at the beginning of the fiscal year but you add a service at any point in time that you do not have a goal/objective/performance measure to report under, don't just put your data in the portal under a similar goal-email <u>prevention@daodas.sc.gov</u> and ask that a measure be added so reporting can be accurate!

1801 Main Street, 12th Floor • Columbia, South Carolina 29201 telephone: 803-896-5555 • fax: 803-896-5558 www.daodas.sc.gov
