"What is Addiction" Community Presentation (Addiction Policy Forum)

An overview of the training curricula entitled, "What is Addiction?" will be presented. The materials were developed by the Addictions Policy Forum for use by any individual or organization that will train members of their community on substance use disorders. The goals for the project are to disseminate the science, combat stigma, and expand the understanding of addiction as a health condition. All materials will be provided on flash drive to prevention staff in the near future for use in the community.
